The 13th Mission: The Story of the Lancaster

577869 DV

IS 48 min 2004

This drama tells the emotional wartime story of a Lancaster bomber, the women who built it, the men who flew it and the heroism and personal sacrifice endured on both sides of the Atlantic. In the Spring of 1944 all of Europe is at war. Before it was over, a million Canadians would join the fight. Back home, a million more worked day and night to supply guns, tanks, ships and planes- the arsenal of democracy. One warplane in particular- the four-engine Avro Lancaster bomber- became a legend. Three teenaged women from rural Ontario turned their hands from farm chores and housework to shooting the rivets that held the Lanc together: One week after D-Day, a crew of young men barely out of high school- set out on a fateful mission, flying from a British airfield through a storm of flak and night fighters to destroy Nazi supply lines in northern France.

50 Poisonous Questions

580290 NS

I SI 2011 Annick Press Ltd.
TANYA LLOYD KYI

Employing an entertaining question and answer format, this book explores various types of lethal substances, both natural and man-made. Beginning with a chapter titles Spikes and Fangs, we are then introduced to poisonous insects, plants, minerals, and gases. We read about poisoners, from the roman empire to the Nazi death camps, and about disasters like Bhopal. The book concludes with a chapter on the positive uses of poisons. With great illustrations and interesting trivia, everyone will love this book!

I

TRANSLATED FROM THE DUTCH BY B.M. MOOYAART

Anne Frank, born in 1929 in Germany, Anne Frank spent two years of her life in astonishing circumstances: she was hidden with seven other people in a nest of rooms in Amsterdam. The Diary of a Young Girl - Her diary tells of the life of a group of Jews waiting in fear of discovery by the Nazis. Yet within it, a tender love story slowly unfolds - from her shy avoidances of a young man named Peter to their incessant glances and first kiss. Thus, her diary is not a lament but a song to life, no matter what the conditions, no matter what the threats. "One of the most moving personal documents to come out of World War II".

MOIRA YOUNG
When the person Saba cares for most in the world is taken from her, acceptance is not an option. Saba's single-minded determination drives her in pursuit of her twin brother Lugh's captors through a post-apocalyptic world: across the desert, through cage fighting in Hopetown and past the hellwurms that stand in her way. Her brash, independent spirit is challenged when she is joined by others in her quest, especially Jack, her potential soul mate (if she doesn't kill him first).

Breaking the Ice: The Story of Mary Ann Shadd

550388 VH

IS

24 min

An evocative, thought-provoking film, Sylvia Sweeney's *Breaking The Ice* spotlights Mary Ann Shadd, abolitionist, suffragette and integrationist. Living in Windsor, Ontario, she fought heroically for education for Blacks, battling the segregationists and starting the first integrated school in Canada. Shadd later went on to become the first female newspaper editor and the first female black lawyer in North America. Through talking to Shadd's descendants - both of family and those who have followed her fight for education and equality - Sylvia Sweeney recreates the early experiences of southern Ontario's Black community and in doing so opens an engaging chapter on Black Canadian and Canadian history.

Bridge to Terabithia (28 Copies)

400823 NS

I

This Newbery Award-winning story is as profoundly affecting now as when it was first published in 1977. Jess Arons has practiced all summer to be the fastest fifth-grader at Lark Creek Elementary in backwater Virginia. But on the first day of school, Leslie Burke, the new girl who isn't even supposed to be on the boys' side of the playground, beats him. She beats everyone. That's the end of Jess's running dream, but the beginning of many others. Leslie is Jess's new neighbour, the only child of two writers who have moved to the country to "reassess their value structure." They don't even have a TV. But everything that makes Leslie weird to the small-town masses makes her wonderful to Jess. She's so accomplished, so smart, so brave. When Leslie suggests that they create a secret kingdom of which they would be the rulers, Jess is frightened, but intrigued. By just swinging over the dried-up creek bed into a shadowy part of the forest they call Terabithia, Jess becomes a king and Leslie a queen. Here, Jess doesn't worry about the school bully or his poor, squabbling family of

sisters. Leslie opens a new world of independence and intellect to him. In Terabithia, he can talk aloud and be an artist and rule a kingdom. But when their reign comes to a tragic end, Jess must use the courage Leslie has helped to uncover in order to carry on.

Broken Toy

550265 VH

JL

24 min

1995

Raymond is a 12-year-old boy who lives with his grandmother. His lonely life is made even lonelier by the cruel verbal and physical treatment he received from other children at school. In the halls, on the playground, even in the classroom. Raymond is the victim of constant bullying namely from Mike, Troy and their "followers". To these youngsters, Raymond's feelings mean nothing. That is until one day...when they go too far. Nobody meant for it to get out of hand and certainly the children didn't mean for the accident to happen...but it did. In the face of tragedy, these "unfeeling" youngsters will finally wake up. But is it too late? Combining a dramatic storyline, performed realistically by actual schoolchildren. Broken Toy is a powerful tool that addresses the problem of bullying directly to children. Broken Toy is a shattering program that will move and educate children like nothing they've ever experienced.

Canadian Boys Who Rocked the World

578515 BK

J1 2007 Walrus Books (Whitecap)
TANYA LLOYD KYI

You don't have to be a grown-up to do something great—and the 30 boys in this book prove it. Breaking world records, becoming heroes on the battlefield, stealing the show in front of the camera, revolutionizing scientific thought—these boys have shaken the planet with their achievements, all before turning 20. At 17, Louis Cyr bested the reigning Canadian strongman by lifting a 180-kilogram granite boulder. Wayne Gretzky was breaking NHL records by the time he was 18. Oscar Peterson won his first radio contest for piano at 14 and was awarded his own 15-minute weekly radio show. Everyday, boys across Canada are finding new ways to rock the world.

JIS 20 min 1997
Cremation of Sam McGee/Owls in the Family Series - Cremation of Sam McGee - There are strange things done under the midnight sun, and Ted Harrison's striking illustrations bring them to life in this famous tale of Canada's Arctic. Max Ferguson relates the story of Sam McGee's final bone-chilling journey. Sam knows his end is near, and

as he recalls his past in the warmth of Plumtree, Tennessee, his dying wish is to be cremated - so that his frozen bones can finally warm up! The trail is dark, the wind roars and the huskies howl...the stage is set for the surprise ending to this favourite adventure story (7:27) *Owls in the Family* - "Animals were good friends to me all the time that I was growing up," Farley Mowat tells us. So it seemed quite natural that Farley and his friends should take owls along for their summer adventures on the bank of the Saskatchewan River. Mowat describes his Prairie boyhood and the animals he knew. Here, he reads a chapter from his book in which the owl, Wol, scares away a group of bullies. A beautifully illustrated tale, told by a master storyteller. (12:02)

Daniel's Story (5 Copies)

400084 NS
I NN 1993
CAROL MATAS
Daniel barely remembers leading a normal life before the Nazis came to power in 1933. He can still picture once being happy and safe, but memories of those days are fading as he and his family face the dangers threatening Jews in Hitler's Germany in the late 1930's. No longer able to practice their religion, vote, own property, or even work, Daniel's family is forced from their home in Frankfurt and sent on a long and dangerous journey, first to the Lodz ghetto in Poland, and then to Auschwitz—the Nazi death camp.

Eric Wilson, Mysteriously Yours

580737 VH
JI 30 min
Eric Wilson is Canada's premiere writer of children's mysteries. Sales of his books in Canada have now topped the million mark. Most of his books feature either Tom or Liz Austun, a pair of brother and sister sleuths who stumble on mysterious adventures wherever they travel. The mystery is the "book" that brings readers to Wilson's books,

but they keep on reading because of the intriguing way he weaves issues, characters and values into gripping stories.

The Eternal Spring of Mr. Ito (6 Copies)

400088 NS
I NN 1985
SHEILA GARRIGUE
Evacuated from war-torn England, Sara Warren has come to stay with her aunt and uncle in Vancouver. She soon becomes friends with Mr. Ito, the old gardener who entrusts her with a spindly quince tree to grow into her own bonsai. Then suddenly the Japanese attack on Pearl Harbor shatters Sara's world. Tragedy strikes her own family and Mr. Ito's, whose wife and children are sent to a desolate internment camp. But despite his own pain and loss, Mr. Ito's courage and faith steady Sara in a world grown ugly.

Exploring Space: Quest for Life

L14372 DX
How did life begin? Is there life outside of Earth? Is there a future for humankind on other planets? Each new discovery inches scientists closer to answering these cosmic questions linking life on Earth with the rest of the universe.

Science and Technology - Space
Exploration; Science and
Technology - Astronomy - Universe

Birth of the Solar System

JIS 7:41 min 2006 PBS
Why is there life on planet Earth? See how the solar system was created by massive molten collisions, and how our

English - Literature and Reading - Intermediate

planet developed the capacity to produce living organisms.

Science and Technology - Space Exploration; Science and Technology - Astronomy - Universe

Building Blocks

JIS 2:05 min 2006 PBS
Understand how the discovery of amino acids helped scientists link terrestrial life-forms to organic material from outer space. Learn about the ice on Jupiter's moon, Europa, and why it is suspected of fostering life.

Science and Technology - Space Exploration; Science and Technology - Astronomy - Universe

Extremophiles

JIS 11:05 min 2006 PBS
What is an extremophile? Follow two scientists as they explore the harshest environments on Earth looking for signs of life. Meet a scientific artist who uses scientific data and his own imagination to create images of how creatures may appear on other planets.

Science and Technology - Space Exploration; Science and Technology - Astronomy - Universe

Human Evolution in Space

JIS 8:18 min 2006 PBS
How will the human body tolerate life on Mars? See how the human heart would be affected by the prolonged change in gravity.

Science and Technology - Space Exploration; Science and Technology - Astronomy - Universe

Impact Craters

JIS 7:03 min 2006 PBS
Learn how impact craters brought life to Earth despite the supersonic blasts that have been attributed to the devastation of species. See how valuable deposits of gold, oil, silver, and diamonds are often found within these historic craters.

Science and Technology - Space Exploration; Science and Technology - Astronomy - Universe

Intelligent Life

JIS 5:15 min 2006 PBS
Listen to neuropsychologist Lori Marino explain the key features inherent to intelligent life. Also, meet an astronomer at SETI who uses radio waves in search of intelligent life throughout the universe.

Science and Technology - Space Exploration; Science and Technology - Astronomy - Universe

Life on Mars?

JIS 7:13 min 2006 PBS
Watch scientists study photographic images of Mars. Learn what led scientists to believe that the Red Planet once contained large amounts of water on the surface.

Science and Technology - Space Exploration; Science and Technology - Astronomy - Universe

Mars Rovers

JIS 11:35 min 2006 PBS
Watch NASA successfully land two rovers on planet Mars. See the photos that confirm the hypothesis that water did exist on the planet.

Science and Technology - Space Exploration; Science and Technology - Astronomy - Universe

The Martian Biosphere

JIS 8:59 min 2006 PBS
What is bioastronomy? See how scientists are studying microbes on Earth that might successfully transplant to Mars. Understand why scientists are targeting equatorial regions of Mars as the best regions for building a biosphere.

Science and Technology - Space Exploration; Science and Technology - Astronomy - Universe

Origin of Life

JIS 7:31 min 2006 PBS
Understand why the diversification of species on Earth was stimulated by cosmic impacts from space. Watch scientists compare crater impacts and micrometeorites on the Earth and the Moon.

Science and Technology - Space Exploration; Science and Technology - Astronomy - Universe

Preparing for Mars

JIS 12:15 min 2006 PBS
After the United States successfully ventured to the Moon, Russia focused their efforts on an expedition to Mars. Watch how the Russians tested the physical and mental capacities of humans to prepare for the long journey to the Red Planet.

Science and Technology - Space Exploration; Science and Technology - Astronomy - Universe

Terraforming Mars

JIS 12:08 min 2006 PBS
Listen to scientists examine the pros and cons of colonizing Mars. Understand the hypothetical process of deliberately modifying Mars' atmosphere, temperature, surface topography, and ecology to replicate the habitable environment of Earth.

Five Star Stories

530265 KT
JI 1990
Goodman's Five-Star Stories series is a collection of 14 anthologies on 7 reading levels (grade levels 2-8), featuring well-known short stories from around the world. Two high-interest companion books on each reading level offer a treasury of fast-paced, multicultural stories. Adventurous tales, chilling endings, surprising twists, shocking plot turns, dramatic struggles, and agonizing conflicts will engage even the most reluctant readers while holding the attention of more-accomplished readers. The reading levels progress from grade 2 through 8, but the interest level for all books is suitable for students in grades 6-12, Adult Basic Education, and English as a Second Language. Each story is accompanied by 5 exercises that help students master reading and vocabulary comprehension, literary elements, and critical thinking - a practical combination of important skills for middle school and high school students. The exercises are organized according to a format the students will find very appealing. They are based on the acronyms TALEs, LEARN, GREAT, SHOCK, TWIST, THINK, AND SKILL.

From Rude To Respectful

578711 DV

JIS 20 min 2006 New Dimension Films

Connect With Kids Series - In a recent survey, 81% of teachers said that students are ruder today than they were 30 years ago. Four of every five children have experienced sexual harassment, and 97% say they have cheated

at school. How can we teach children respect and responsibility? Viewers will meet Michelle, 15, whose out of control behavior almost got her kicked out of school. This important program examines if troubled kids act the way they do because they feel isolated and don't feel a real connection with those around them. From Rude to Respectful chronicles the positive efforts of a school to emphasize character, and one family whose members developed a personal mission statement about how they want to treat each other. The concepts of honesty, responsibility, respect, compassion, and self-discipline are emphasized. The program concludes with Michelle, who becomes an honor student after responding to efforts to turn her life around.

Half Brother (6 Copies)

580244 NS
JI NN 2010 Harper Collins
KENNETH OPPEL
When Ben Tomlin's mother brings home
his new "baby brother," an eight-day-
old chimpanzee, Ben is far from thrilled.
His father, a renowned behavioral sci-
entist, has uprooted the family and

moved them halfway across the coun-
try, to Victoria, B.C., so he can pur-
sue a high-profile experiment—to deter-
mine whether chimpanzees can learn
human sign language. Zan must be
raised exactly like a human. He's
dressed in clothes and fed in a high
chair and has a room full of toys and
books. Ben is soon smitten. Joining
the team of students who are helping
with the experiment, Ben becomes both
researcher and adored older brother.
Within months, Zan learns his first signs
and becomes a media sensation. At
his new school, Ben's life seems simi-
larly charmed as he vies for the atten-
tions of the beautiful Jennifer, using his
newly acquired scientific observational
skills. But when Project Zan unexpect-
edly loses its funding, Ben's father is
under huge pressure to either make the
experiment succeed or abandon it and
Zan. Unable to convince his father that
Zan is now part of the family, Ben must
risk everything to save his baby brother
from an unimaginable fate.

In March 2000, a suitcase arrived at a
children's Holocaust education center in
Tokyo Japan. On the outside, were the
words: Hana Brady, May 16, 1931, and
the Wasisenkind - the German word for
orphan. Japanese children through the
Fumiko Ishio Ka center investigate the
suitcase and Hana Brady, searching for
clues across Europe and North Amer-
ica. This mystery takes the children
back through 70 years of history to the
Nazis invasion of a small Czech town.

Dicey's mother didn't make many explanations. Maybe that's why she didn't explain her mysterious behavior the night she packed up the whole family and sped off into the night...Or why she pulled the car into a shopping center the next morning and just walked away without a good-bye. Now Dicey, James, Sammy, and Maybeth were stranded in an unknown town, and it seemed that every grown-up in the country was against them. That meant ducking authorities, sleeping in cemeteries, and doing anything to keep clear of foster homes. It also meant walking for miles and miles...But Dicey hadn't given up completely; she knew there must be one adult she could trust. And she figured if she could just keep her brothers and sister together, eventually they'd have their HOMECOMING.

I.D. Stuff That Happens To

Define Us

580294 NS

IS SI 2010 Annick Press Ltd.
KATE SCOWEN

This is a collection of personal narratives from ordinary people who, in their youth, underwent life changing moments that shaped who they are today. They are real stories of friendship, death, abuse, reconciliation and sexual orientation - told simply, authentically, for the purpose of helping teen readers develop their own i.d.'s (identities) in similar circumstances. As these tales are short, accompanied by graphical illustrations, followed by a bibliography of self-help resources at the end - this is an excellent book to generate classroom discussions on social issues.

Inside the Teenage Brain

575911 DV

IS 46 min CA 2002

Excellent P.D. opportunity for all intermediate teachers who work with adolescents. New adolescent brain research explaining their behaviours and attitudes. Explores new brain research done on adolescents and details how this research explains some typical adolescent behaviours. It looks at how teenagers "read" expressions on people's faces and often get miscues about the feelings of parents and teachers because they are processing visual clues with a different part of their brain than adults. Adolescents attend a sleep clinic and viewers watch as an experiment shows how seriously a lack of sleep affects learning. Explores some myths about young adolescents. Their brain, not their attitudes might account for their lack of forward planning. One of the most illuminating pieces of research visited in this documentary is a large survey of adolescents on their views of their parents, their parents' work and their families. Viewers of the film will get new insights into this group of normal adolescents. Parents may get a refreshing view of other people's teens and perhaps learn something about how they can affect their own children's lives for the better.

The Legend of Sleepy Hollow and Rip Van Winkle (11 Copies)

400819 NS
I NN 1980
WASHINGTON IRVING
Ichabod Crane, the schoolmaster in the small village of Sleepy Hollow, is fascinated by the ghostly tale of the Headless Horseman. But then, one dark night, Ichabod is chased through the woods by the phantom rider... The memorable story of Rip Van Winkle is about a good natured—but lazy—man who sneaks away into the hills and falls asleep. When he awakens twenty years later, Rip finds that quite a few things have changed!

Literacy Strategies for Grades

4-12

578473 BK

JISG NN 2005 A.S.C.D.

KAREN TANKERSLEY

It's tough to teach students science, math, or social studies when they have a hard time reading the textbook. But now, every teacher in grades 4-12 can use the ideas and classroom exercises from this practical guide to help students read for accuracy, extract meaning from text, and interpret their subject-area readings. An experienced teacher and author describes everyday classroom practices—from 15-minute projects to semester-long whole-grade assignments—that motivate struggling students, rescue poor readers, and teach reading skills to English language learners. Get lots of easy-to-use teaching strategies while you explore the basics about reading that every teacher needs to know: - Why adding a before-, during-, and after-reading strategy to assignments builds your students' comprehension and understanding of texts - How to expand your students' content-specific word knowledge with vocabulary webs and games, word walls, and word learning strategies - Why reading aloud to your students improves their reading fluency - How to ensure students get more out of texts by using creative writing assignments, discussions, and other strategies for extending their thinking

Literature Circles

574451 BK

JL SI 1994

DANIELS, HARVEY

Two potent ideas - independent reading and cooperative learning- come together in this practical and exciting book. This unique model of literature circles was developed by a team of mid-west teachers who combined local inventions with models appearing in the national professional literature. Daniel and his colleagues have been especially concerned with the issues of management, the preparation of students, and enacting the principles of classroom democracy and group dynamics. Their special contribution has been to add to literature circles the key formal elements of collaborative learning - particularly through the varied roles they use to guide students in newly-formed groups. Designed to be practical for teachers who want to start and refine student-led literature discussion groups in their classrooms, Daniel's book features: - specific techniques for starting and managing Literature Circles; - lots of variations which may suit different students, grade levels, and teaching styles; - reproducible role sheets in English and Spanish; - ideas and suggestions for extending Literature Circles across the curriculum. Drawing on stories from twenty-two classroom teachers who work with students from Kindergarten through college, this book delivers ample guidance and inspiration for teachers who want to implement Literature Circles for themselves.

JEAN LITTLE

Jean Little has led an extraordinary life. Nearly blind from birth, she had what her friends called "bad eyes." Subjected to ridicule, rejection and bullying, she often withdrew into a world of her own—the world of her imagination. But she still had to live in the real world, to struggle to make a place for herself, to find friends, even to attend regular classes. Encouraged by her parents, she began to write poetry and stories. By the time she was seventeen, her poetry had been published in a national magazine, and after that she never looked back. Honest, moving and sometimes very funny, this is an unforgettable account of the joys and pains of childhood and growing up, of family and of love.

Little Ice Age: Big Chill

L19402 DX

Examine the cataclysmic consequences of the "Little Ice Age," and see what it might tell us of the future. Climatologists reveal what happened, and debate whether a similar cataclysm is in store for the 21st century. See how a

few small degrees of difference changed the face of the world for centuries

Science and Technology - Earth
Science - Global Warming

Causes of the Little Ice Age

JIS 3:17 min 2005 A&E Television
Networks

While the causes of the Little Ice Age remain a mystery, climatologists are trying to figure out the cause because they believe it is not an isolated event but a recurring cycle. Scientists are studying core samples obtained from the fossilized remains of microscopic creatures found in the sediment below the ocean floor and have concluded that during the Little Ice Age the earth was, on average, four degrees cooler than today.

Science - Global Warming

The First Signs of the Little Ice Age

JIS 17:06 min 2005 A&E Television
Networks

Around 1315, the weather in Europe changed dramatically when rain persisted for five years flattening crops and turning farmland into water pits. If the people did not die from starvation, they died from diseases, such as the Bubonic plague, or from being burned at the stake as witches, as the people, fueled by the Church, accused their neighbors of causing the destructive climate. The Vikings, who had terrorized Europe, were unable to cope with the changes in the climate when they colonized Greenland, and having dismissed the Inuit culture as inferior, died out.

The Last Ice Age and War

JIS 10:51 min 2005 A&E Television
Networks

Severe weather had a dramatic effect on the outcome of at least three wars. Napoleon's invasion of Russia was one of the most catastrophic military disasters in history as the unusually severe climate killed his troops in the thousands from freezing, starvation or disease. The British were victorious over the Spanish Armada, primarily because the Spanish were defeated by the unusually severe weather, in which huge seas swept sailors to their deaths or the ships were driven into the coasts of

English - Literature and Reading - Intermediate

Scotland and Ireland. George Washington crossed the ice choked Delaware River surprising the British and defeating them at Trenton, New Jersey during the Revolutionary War, because the English did believe an army would cross the river or march to their encampment in such severe weather.

The Stradivarius Violin, Beer and Hard Liquor

JIS 8:38 min 2005 A&E Television Networks

It is believed that the superb quality of the Stradivarius violin might have been due to the wood used in the Stradivarius that came from trees that may have had a superior property of resonance due to their slow growth during the Little Ice Age. There is also a belief that because

of the severe climate change that killed off the vineyards in Britain, and northern Europe, people, to satisfying their cravings for alcohol, invented beer and hard liquor using the depleted supplies of cereal crops.

Science and Technology - Earth
Science - Global Warming

Theories of the Causes of the Little Ice Age

JIS 7:16 min 2005 A&E Television Networks

Some scientists believe that the increase in volcanic eruptions, in which sulfur particles in the atmosphere help to block the radiation of the sun, cooled the earth and caused the Little Ice Age, while others believe the Little Ice Age was caused by a disruption to the Thermohaline Circulation, the oceanic conveyor belt. During the coldest seven decades of the Little Ice Age's five hundred year span, the cause, according to scientists, was due to the Maunder Minimum, in which the number of sun spots on the face of the sun were less than normal causing the sun to send out less radiation to warm the earth.

The Year Without Summer and the End of the Little Ice Age

JIS 9:59 min 2005 A&E Television Networks

The year without summer occurred in 1816, a year after Mount Tambora in Indonesia exploded with a hundred times more force than the eruption of Mount St. Helens in 1980. The year after its eruption, brown and red snow fell, and severe arctic weather devastated crops, killing multitudes of people and causing rioting throughout the cities of Europe. Four decades after the year without summer, the Little Ice Age came to an abrupt end, and scientists are still trying to figure out what caused it to end.

Lost in the Barrens (29 Copies + guide)

400726 NS

I

A Canadian classic since its first publication in 1956, Farley Mowat's tale of hair-raising adventure, loyalty, friendship and the battle between humans and nature has as much zest as any contemporary novel. Part of the reason that *Lost in the Barrens* is such a great story is the author infuses it with his own knowledge of the outdoors and passion for the North, as well as fascinating details about making equipment and clothing and the magnificent tradition of following the caribou herds. Mowat's two boy heroes, Awasin Mee-wasin and Jamie MacNair, couldn't be more different. The fair-haired Jamie has come from Toronto to live with his Uncle Angus in the North, ready and able to learn the arts of hunting, trapping, fishing and canoeing. Awasin is his friend, a somewhat remote and extremely capable young Cree who longs to be a man and go off to the caribou hunt. But when the boys sneak off on an adventure with a band of Chipewyans to the Barrens, they never expect their canoe to capsize, separating them from the band and stranding them in the Barrens. For the terrible arctic winter is

English - Literature and Reading - Intermediate

coming on – and with only Jamie's energy and Awasin's trained skills to guide them, the pair must survive blizzards, bears and hunger before they make their way home.

Farley Mowat

This feature length drama set in the 1930's tells the story of Jamie, an orphaned city teen who goes to live with his uncle in the subarctic wilderness. There he meets Awasin, a Cree Indian his own age, son of the chief hunting guide. On an expedition to gather meat for winter, the boys are left at a base camp while the older men travel to the dangerous barrens in search of deer. Losing their canoe on an ill-advised side trip the two strike out in search of the hunters. Underclothed, under fed, and without weapons, the boys survive a harrowing battle with a hungry grizzly bear and fearsome struggle against the elements. Out of a common need comes an alliance that keeps them alive and forges a friendship that will last a lifetime.

A Man Worth Knowing: The Memoirs of Hans-Georg Neumann

575822 BK
IS NN 1996

The late Hans-Georg Neumann, through his memoirs, has brought alive the history, the culture and the brutal tragedy of 20th century Germany. While serving under General Erwin Rommel in 1941 as a signals officer, Hans-Georg was captured. Months of confinement in barbed wire cages in Egypt and South Africa were followed by his eventual imprisonment in a former tuberculosis sanatorium at Gravenhurst, Ontario. Only the presence of a decent Canadian Commandant and his own energy saved his integrity and humanity. With a soldier's self-discipline and a farm boy's instinct, Neumann and his fellow prisoners created a farm that fed the camp and nourished their souls. The author's story covers his return to Canada in 1950 and his subsequent commitment to Canada, his chosen country.

Moi, Je Fais de L'art Comme Ron Noganosh

577669 VH
JI 16 min 2005
Serie Moi, Je Fais de L'art - Ron
Noganosh est un sculpteur et un artiste-
installateur de grande reputation, qui
transforme des objets du quotidien -
enjoliveurs rouilles, pieces d'ordinateur,
plumes - en objets d'art aussi amusants
et ingenieux qu'evocateurs. S'inspirant
des sculptures de Ron creees a partir
d'objets trouves, les eleves decouvrent
comment transformer des rebuts en ob-
jets d'art. Des themes sur l'identite
personnelle et culturelle se degagent
alors qu'ils developpent leurs habiletés
et leur confiance en eux, tout en ob-
servant un monde de possibilites cre-
atrices.

JAMES LINCOLN COLLIER AND
CHRISTOPHER COLLIER

All his life, Tim Meeker has looked up to his brother Sam. Sam's smart and brave, and always knows the right thing to do. In fact, everyone in town had admired Sam Meeker. Until now. Now Sam is part of the new American Revolutionary Army. He talks about defeating the British and becoming independent and free. But not everyone in town wants to be a part of this new America. Most people are loyal supporters of the English king—especially Tim and Sam's father. The war is raging, and Tim knows he'll have to make a choice. But how can he choose—when it means fighting his father on one side, and fighting his brother on the other?

New Explorers

This acclaimed documentary series highlights the exciting role of modern scientists, "new explorers" of today, as they pursue the never-ending adventure of discovery. The New Explorers rebroadcasts also continue on PBS television until the year 2000. The New Explorers' camera crews have traveled from the rain forests of Bolivia to Africa's Sahara Desert; from the research labs of the National Cancer Institute to a submarine research vessel under the South Pacific; from the Maasailand of East Africa to a Hollywood sound stage...in pursuit of the thrill of scientific discovery. Our hero is a scientist.

Other Goose: Recycled Rhymes for Fragile Times

578534 BK

JIS 2007 House of Anansi Press
BARBARA WYN KLUNDER

In this gently subversive book, artist and designer Barbara Klunder takes classic nursery rhymes and turns them on their heads, adding her own quirky twist to familiar favorites. "Rock-A-Bye Baby" laments the loss of her treetop to logging. Old Mother Hubbard must resort to a food bank. Jack and Jill discover that their well water is polluted, and Mary watches her garden flourish with weeding and fertilizing. Second-hand smoke, recycling, allergies, logging, pollution, oil spills, gasoline shortages and crooked politicians are all treated with

Klunderesque whimsy and wit. Graphically striking, spiky, engaging black-and-white illustrations drive the point home-what are we doing to the planet? Other Goose is a great family read as well as a gift book for all ages.

The Outsiders (30 copies)

400816 NS

I

S.E. HINTON

The Outsiders are a rough and swinging gang of long-haired teen-agers from the wrong side of the tracks. They have little hope for the Mustangs and madras shirts and all the rest of the material pleasures of American life. Their mode of expression is violence - directed toward the group of privileged kids who are at once objects of their envy and their hatred. This is their story, and especially the story of Ponyboy, tough and sensitive, whose inner conflicts and fierce drives shape a moving novel of young people trying to find their place in a world they never made.

Friendship; Literature Novels; War

Owls in the Family

550381 VH

JJ 13 min 1997

Canadian Classics Series - Canadian author Farley Mowat talks about his boyhood in Saskatchewan and of the animals he had there. He talks of writing his children's book *Owls in the Family* and reads a chapter in which Wol, the owl scares away the bullies who catch the younger boys and want to take over their cave.

History-Canada; Literature General

Owls in the Family (15 Copies)

400713 NS

I

Every child needs to have a pet. No one could argue with that. But what happens when your pet is an owl, and your owl is terrorizing the neighbourhood? In Farley Mowat's exciting children's story, a young boy's pet menagerie - which includes crows, magpies, gophers and a dog - grows out of control with the addition of two cantankerous pet owls. The story of how Wol and Weeps turn the whole town upside down is warm, funny, and bursting with adventure and suspense.

Poetry in a Nutshell

577540 SW

JL 1999

Poetry in a Nutshell Poetry in a Nutshell is designed to help students improve their appreciation of the poetic art. This program consists of three parts: Poetry in a Nutshell which introduces the student to the important elements of poetry; The Character of Poetry explores imagery, tone, mood and features forty-six poems that can be listened to or read; and Resource Materials includes printable notes for students and teachers. It combines pictures, graphics, sound and music and allow users to enhance their reading and understanding of poetry. Nutshell explores the way in which the poets create imagery, emotional overtones and attitudes towards subject, audience.

The Prince and the Pauper (7 Copies)

400085 NS
I NN 1964
MARK TWAIN
They are the same age. They look alike. In fact, there is but one difference between them: Tom Canty is a child of the London slums; Edward Tudor is heir to the throne of England. Just how insubstantial this difference is becomes all too clear when a chance encounter leads to an exchange of clothing—and of roles...with the pauper caught up in the pomp and folly of the royal court, and the prince wandering horror-stricken through the lower depths of sixteenth-century English society. Out of the theme of switched identities Mark Twain fashioned both a scathing attack upon social hypocrisy and injustice, and an irresistible comedy imbued with the sense of high-spirited play that belongs to his happiest creative period.

Six Degrees Could Change the World

L111855 DX
Six Degrees is an extraordinary journey into our planet's future to explore the potential impacts of global warming degree-by-degree - through six degrees over the next hundred years. Filmed on 5 continents, Six Degrees tracks the

world's top climate researchers and follows ranchers, photographers and everyday people to uncover the hidden signs and climate trends. From Greenland's ice sheet to tropical ocean coral reefs, from Himalayan glaciers to the Amazon rainforest, come chilling firsthand accounts of climate change already underway - and evidence of more to come. As global warming reaches into the lives of ordinary people, scientists on the frontlines race against the clock to determine if the climate models are right and if they are, how bad things could get. As the mercury rises, what could the next century of climate change really look and feel like? Super-realistic computer graphics, stunning high definition imagery and the world's most remote and spectacular locations provide an unprecedented preview into a potentially catastrophic future. The journey of Six Degrees concludes with an examination of solutions, both great and small, we can use to defuse the global warming time bomb.

Science and Technology - Earth Science - Global Warming

Earth: Five Degrees Warmer

JIS 4:02 min 2007 National Geographic
If the world warms five degrees, massive uninhabitable zones appear. Some of the world's largest cities completely dry out. Climate refugees number in the hundreds of millions. This is the "twilight zone" of climate change.

Science and Technology - Earth Science - Global Warming

Earth: Four Degrees Warmer

JIS 15:28 min 2007 National Geographic
A rise in Earth's temperature by four degrees would cause oceans to rise, nations to flood, and the west Antarctic ice sheet to collapse.

Science and Technology - Earth Science - Global Warming

Earth: One Degree Warmer

JIS 12:50 min 2007 National Geographic
If the world warms by one degree the Arctic is ice-free half the year. Flooding takes out millions of homes, hurricanes increase, and drought devastates crops worldwide.

Science and Technology - Earth Science - Global Warming

Earth: Six Degrees Warmer

JIS 2 min 2007 National Geographic
World disaster survivors would fight it out with each other for the remaining resources. Oceans would become marine wastelands if world temperature rose six degrees.

Science and Technology - Earth Science - Global Warming

Earth: Three Degrees Warmer

JIS 20:09 min 2007 National Geographic
All summer, the Arctic would be free of ice with an average temperature rise of 3 degrees. The Amazon Rainforest would dry out. El Nino extreme weather patterns become the status quo.

Science and Technology - Earth Science - Global Warming

Earth: Two Degrees Warmer

JIS 16:54 min 2007 National Geographic
If the average temperature rises more than 1 degree Celsius, nature's balance could be upset from sea beds to the highest mountains. Insects migrate in strange directions, forests cover Canada's melting tundra.

Science and Technology - Earth Science - Global Warming

Earth's Vital Signs

JIS 7:46 min 2007 National Geographic
Thousands of ships and weather stations around the world, as well as satellites in space track Earth's vital signs. Collected data reveals what lies ahead for the planet.

Science and Technology - Earth Science - Global Warming

Planet Earth and Global Warming

JIS 4:01 min 2007 National Geographic
Planet Earth has the resources and the experience to combat global warming. Global heating spiked during the Cretaceous Era. The earth absorbed massive amounts of carbon.

Science and Technology - Earth Science - Global Warming

Six Degrees

JIS 3:36 min 2007 National Geographic
Six degrees in terms of a global average temperature change is the difference between today and the last ice age. The effects of a rise in six degrees would start high above the earth. Finally, the climate all over the world would be radically affected.

Science and Technology - Earth Science - Global Warming

Solutions for Global Disaster

JIS 9:10 min 2007 National Geographic
Experts say that "there is no place like home" when it comes to finding solutions for global warming. More than half the electricity in the U.S. goes into buildings of some kind. Solutions start with energy efficiency.

Stephen Harper: The Path to Power

IS

14 min

2006

Cbc

CBC News in Review, 2006 Series - On February 6, 2006, Stephen Harper was sworn in as the 22nd Prime Minister of Canada. The Conservative Party leader has been a familiar figure on the Canadian political scene for a number of years. However, many Canadians don't know much about him, or why he decided to enter politics. In this News in Review story we'll look at Stephen Harper, the politician and the man, and at his path to power.

The Story of Bread

575407 VH
IS 24 min 2000
Bread is the oldest food known to mankind. The history of bread is the history of Western Civilisation. Angie, intrepid student reporter, takes us on a bold and imaginative journey into 10,000 years of history. We see the first risen loaf baked by an Egyptian woman in her courtyard kitchen 6000 years ago; we join Greek worshippers at the sanctuary of Demeter, Goddess of Bread, 700 years before Christ; we meet Roman war veterans queuing up for the dole which was paid with bread; and in medieval times, we ask how the wealthy could eat off plates of bread while most

people starve. We take a brief look at the impact and changes that came with C19th industrialisation, through to mass production in the present day, and gene technology in the future. The Story of Bread is not just history, it also explores society, culture, anthropology, politics, war and technology. Guide included.

The Trumpeter of Krakow (4 Copies)

400082 NS
 I NN 1928
 ERIC P. KELLY

It is the fifteenth century in Poland. The Great Tarnov Crystal is a mysterious and powerful gem. Joseph Charnetski and his family are bound by an ancestral oath to keep the crystal safe. Evil, greedy and superstitious people would like to use the crystal for their own purposes. The Charnetski's bring it to Krakow for the king's safekeeping. The king, however, is away and they must wait in Krakow until his return. Joseph's father takes on the honorable job of the Trumpeter of Krakow. He sounds the hour and must be alert for danger-fire or enemies-from the tower of the church. He teaches his son Joseph the song to play. It is in the tower that Joseph proves his courage and saves not only the Great Tarnov Crystal but the lives of his family and his friends-even the city of Krakow itself!

1995

With exceptional animation and haunting cello music, filmmaker Christine Moulson asks viewers to consider images of ideal beauty. Wandering along the sometimes busy, sometimes quiet Cook street, viewers gradually become aware that the world is being observed through the eyes of an unseen person. Fixating on youth and beauty, this person is reflecting on Western society's obsession with the ideal body image. As the seasons pass and the film progresses the person becomes more and more visible. The woman is enormous; her beauty is age and experience.

SHEILA GORDON

Tengo and Frikkie are childhood friends—one is black, one is white; Tengo, a "boy" on Oom Koos's farm on the South African veld, and Frikkie, the

farmer's nephew, who one day will inherit the family's land. Though they live in different and conflicting worlds, their friendship is forged when they are too young to know that there are lines that must not be crossed. But as the tension mounts in South Africa, the boys find their relationship in crisis when they realize the differences in their beliefs. Tengo abandons farm life for school and struggles against apartheid. Frikkie, who longs to forgo his studies to work the land, enters the army, waiting for the day when he can return to the farm. As Tengo commits his life to change, Frikkie tries to preserve life as it has always been. Can the two hold on to the friendship that began before the turmoil shattered their dreams?

The Wall: Growing Up Behind the Iron Curtain

578537 BK

JIS 2007

Frances Foster Books

PETER SIS

He was born in the middle of Europe in the middle of the twentieth century at the start of the Cold War. In his graphic memoir, Peter Sis tells what life was like for a boy who loved to draw and make music, who joined the Young Pioneers, stood guard at the giant statue of Stalin, passed Louis Armstrong in a snowstorm, longed for blue jeans and Beatles-style boots, let his hair grow long, secretly read banned books, listened to jammed radio, and traveled with the Beach Boys when they toured Czechoslovakia. Peter Sis's story of growing up under a totalitarian regime proves that creativity can be discouraged but not easily killed, and that the desire to be free came naturally to a

generation of young people behind the Iron Curtain.
